DETAILED ACTION

1. Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term steel cable is incorrect. "cable" refers to elongate objects that does not have any rigidity along its longitudinal direction.

"using characteristics...as being non-slippery" is confusing.

In claim 1, the recitation "provide the steel cable with elasticity" is confusing. It is unclear how the fixing plate 231 would give any elasticity to the steel cable.

In claim 1, it is unclear what comprises the bending cable.

In claim 1, "a bending cable at the bottom portion of the golf club bag and for corresponding with a side of the supporting posts" is confusing.

In claim 1, "for that hat the bending portion is appressed against the planar surface" is confusing.

2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Cheng (6386362). Cheng teaches a golf bag having a pivotal section near a periphery of an opening, two supporting posts 64, and a steel cable 64, and a fixing plate. The bottom is divided into a fixed portion and a bending portion and the bending portion is pressed against the surface as claimed.

Regarding claim 2, note the embedding element is disposed at the inner periphery of the bottom portion of the golf bag as shown in Fig. 7.
